BALUSTRADES

Intergrating Function with Style

Appeal

With sleek contemporary lines, ECLIPSE VOGUE will complement your home or building project. The timeless styling suits a wide range of architectural themes. Less apparent technical design innovation offers clean joints, concealed assembly fasteners and rounded edges concluding a tidy and elegant balustrade.

Your View

Should minimal obstruction of your view be an important factor in your decision - ECLIPSE VOGUE is an unobtrusive solution compared with many alternatives. With style options incorporating glass infill, or fine vertical balusters, it is a good-value choice for the discerning buyer.

The Finish

Aluminium is an ideal material for a durable balustrade, with its inherent non rusting and stable properties. Lending itself well for trusted finishes such as powdercoating and anodising, makes it available in a wide range of colours, which can be coordinated with aluminium joinery if desired. Also note that the assembly screws are stainless steel to avoid any rusting problems in the course of time.

Safety

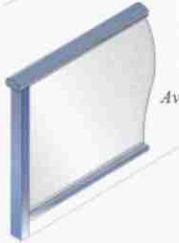

Uncompromising on safety, ECLIPSE VOGUE balustrades are engineered to comply with the NZ Building Code regulations, when fabricated to the Manual recommendations giving peace-of-mind to the homeowner.

Ascot
